

Xavier University of Louisiana College of Pharmacy

Postgraduate Year One Residency Program

Purpose

Upon completion of this program, the resident will be able to assume a clinical position in an ambulatory clinic, hospital setting or a faculty position in academia. Because of this purpose, the program is designed to develop clinical practice skills that can be applied to pharmacist-managed, interdisciplinary, or managed care team approaches to patient care.

In addition to clinical practice, opportunities are available for didactic and experiential teaching, precepting, and outcomes research with the Center for Minority Health and Health Disparities Research and Education (CMHHDRE). The postgraduate year one residency program includes training in internal medicine, family practice, and medical subspecialties including cardiology, endocrinology, anticoagulation, infectious disease, hematology/oncology, and HIV/AIDS.

Required Rotations

Orientation
Internal Medicine (1 rotation)
Ambulatory Care (4 rotations)
Drug Information (concentrated)

Longitudinal Experiences

Management
Staffing (inpatient and ambulatory care component)
Research

Elective Rotations (2)

Academia
Critical Care
Digital Medicine
Endocrinology
Hepatitis
Oncology
Infectious Disease
Medication Therapy Management
Pain Management
Pediatrics
Psychiatry
Transition of Care

The PGY1 resident is required to staff at the University Medical Center (New Orleans) Inpatient Pharmacy every fourth weekend. The resident also staffs every other week at an ambulatory care clinic. Sequencing and scheduled experiences are modified during the year based on changes in resident interest and customization based on interests and/or performance.

Xavier University of Louisiana College of Pharmacy Postgraduate Year One Residency Program

During the residency, the resident will serve as a co- preceptor for pharmacy students from Xavier University of Louisiana College of Pharmacy. The resident also has opportunities to teach a variety of health care professionals (pharmacists, physicians, medical residents, nurses) at other venues (i.e. staff education seminars, noon conference, continuing education programs). There is also an opportunity to earn a teaching certificate.

The resident will design and complete a research project under the guidance of a project preceptor. Project results are to be presented at ALCALDE Residency Conference held in the spring.
