

LIST OF CONTENTS

	pg.
Terms and symbols	5
1 Introduction	9
2 Connection design	11
3 COMPONENT BASED FINITE ELEMENT METHOD	
3.1. Material model	18
3.2. Plate model and mesh convergence	20
3.3. Contacts	23
3.4. Welds	24
3.5. Bolts	26
3.6. Interaction of shear and tension in bolt	28
3.7. Preloaded bolts	30
3.8. Anchor bolt	31
3.9. Concrete block	32
3.10. Local buckling of compressed plates	35
3.11. Moment - rotation relation	37
3.12. Bending stiffness	40
3.13. Deformation capacity	43
3.14. Joints in global analyses	45
4 WELDED CONNECTION	
4.1. Fillet weld in lap joint	49
4.2. Fillet weld in angle plate joint	57
4.3. Fillet weld in fin plate joint	57
4.4. Fillet weld in beam to column joint	64
4.5. Connection to unstiffened flanges	68
5 BOLTED CONNECTION	
5.1. T-stub in tension	73
5.2. Splices in shear	82
5.3. End plate minor axis connection	86
5.4. Generally loaded end plate	89
5.5. Interaction of shear and tension in bolt	93
5.6. Splices in shear in slip-resistant connection	98
5.7. Block shear resistance	101
5.8. End plate connection with four bolts in row	108
5.9. Single sided gusset plate connection	112

6	SLENDER PLATE IN COMPRESSION	
6.1.	Triangular haunch	118
6.2.	Column web panel in shear	125
6.3.	Column web stiffener	129
7	HOLLOW SECTION JOINT	
7.1.	Uniplanar T-joint between RHS braces and RHS chords	133
7.2.	Multiplanar TT joint between RHS braces and SHS chords	141
7.3.	Uniplanar T-joint between longitudinal gusset plate and RHS chord	146
7.4.	Uniplanar T-joint between RHS brace and H/I chord	150
8	COLUMN BASE	
8.1.	Open section column in compression	157
8.2.	Open section column in bending to strong axis	161
8.3.	Open section column in bending to weak axis	167
8.4.	Hollow section column	173
9	COLUMN WEB PANEL IN SHEAR	
9.1.	Welded portal frame eaves moment connection	181
9.2.	Bolted portal frame eaves moment connection	189
10	PREDICTION OF STIFFNESS	
10.1.	Bending stiffness of welded joint of open sections	194
10.2.	Bending stiffness of bolted joint of open sections	197
10.3.	Bending stiffness of column base	201
11	PREDICTION OF DEFORMATION CAPACITY	
11.1.	Deformation capacity of welded joint of open sections	205
11.2.	Deformation capacity of bolted joint of open sections	209
12	PREQUALIFIED JOINTS FOR SEISMIC APPLICATIONS	
12.1	End plate connections	214
12.2	Welded reduced beam section joint	222
