AD Workbench

Search across 50 dataset(s) in the AD Workbench

FAIR Data Services gives you the ability to discover datasets and understand their relevance by viewing dataset catalogue and dictionary metadata.

Discover Data

Easily discover the data in your community by searching for dataset metadata

Browse Metadata

Understand datasets by browsing metadata and associated resources

Learn

Learn about FAIR Data Services and the FAIR Data Principles

Featured Datasets

The Geras Study - US

Visibility: Internal

The Geras Study - US was a prospective, multicenter, observational study that aimed to assess societal costs and resource use associated with AD among patients and their primary caregivers across 76 sites in the United States. Eligible patients were between the ages of 55 and 85 years
