Is it okay if a student misses a day or two of the Program?
No. The programs are short in duration and cover a lot of content. As such, it does make a big difference if a student misses a day.

What will happen if a student misses a day?
He/she will receive a zero in all class activities missed that day. Students who are habitually late or absent will be dismissed from the program.

Can a student use courses to replace his/her regular high school course in algebra, geometry, biology, or chemistry?
No! Xavier Summer Programs are not intended to replace high school courses. Rather they are designed to enhance the student’s preparation for their courses in the fall.

Do grades in the programs count?
While the grade does not count toward the official high school or college transcript, grades count towards the successful completion of the summer program. Note: Students in any summer program are not officially enrolled at the University. However, the university will make a note on each student’s record as a participant of its university enrichment program.

What technology is required?
All program participants must have a personal GMAIL address (NOT school email or other domain). All program participants must have access to a personal laptop or desktop computer (NOT an iPad, smartphone, Android tablet, or Chromebook) and a high-speed internet connection for the duration of the program. Students will need access to computer/internet for the entirety of class time AND to complete homework after class. The computer must have a webcam and microphone. We encourage all students to use headphones with in-line microphone (or a headset). The operating system or the laptop or desktop must be sufficient to run Zoom and have an up-to-date internet browser installed such as Google Chrome or Firefox. It is recommended that students have a smartphone with camera and microphone with the ability to record and upload videos. Projects will have an audiovisual option, and small groups will communicate via GroupMe.
